AMERICAN DIAGNOSTICA INC. INTRODUCES NEW PRODUCT CATALOG

Stamford, CT . . . American Diagnostica Inc. (ADI) announces the release of a new full-color Product Catalog. The catalog highlights and clearly describes the entire line of ADI products available to the clinical diagnostic, hemostasis, oncology, vascular biology, drug discovery and life science markets, while illustrating a wide selection of industry-respected and acknowledged test kits, assays, research reagents, control materials and calibrators/standards.

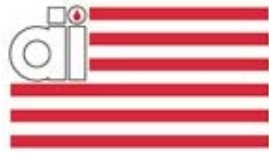

The Catalog is broken down into nine (9) Sections with expanded descriptions, emphasizing recently introduced products and those that are FDA cleared and/or CE marked.

Products are easy to locate, arranged alphabetically by category, as follows: Clinical Diagnostic Assays; Research Assays; Control Plasma and Sera; Proteins; Antibodies and Antisera (including clone, host and application information); Chromogenic and Fluorogenic Substrates; Protease Inhibitors; Snake Venom Protease Activators and Special Collection Tubes for Blood.

Also included are two (2) product specific indexes arranged alphabetically and numerically by product reference (REF) number, and a worldwide listing of distributors. Medical laboratory professionals, drug discovery scientists and life science researchers will find the catalog to be an invaluable reference tool.

For additional information, contact American Diagnostica Inc., P.O. Box 110215, Stamford, CT 06911-0215, Telephone: (203) 602-7777, e-mail: services@amdiag.com, or visit our web site at www.americandiagnostica.com.
